Wall Condition Requirements

The door must be installed in a wall opening that is plumb and level. The floor must be a hard surface (IE, concrete, wood, tile) and free of humps or bellies.

It is also recommended to use a level on the face of the wall surrounding the opening and verify that the surfaces are flat.

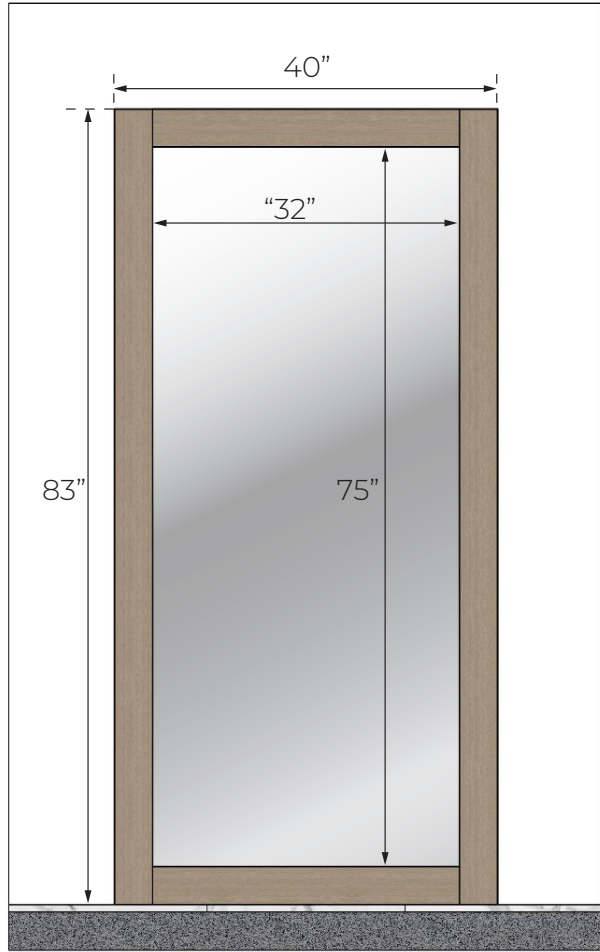

NOTE: The final quality of the concealment and function of the door depends heavily on the quality of the door opening. For best results, correct any wall or floor issues before beginning your installation.
